

Detected Issue:

Overly permissive access granted to allUsers (public access).

Risk Level:

High (Severity: High, Score: 9)

Recommendation:

Remove 'allUsers' and use IAM groups or specific roles with least privilege.

Real-Time Search-Based Tips:

\* Tip 1: No harmful health effects were found in 195345 residents living in the vicinity of the plant who were screened by the end of May 2011.

\* Tip 2: Indecent exposure is the deliberate public exposure by a person of a portion of their body in a manner contrary to local standards of appropriate behavior.

\* Tip 3: The main objective of this publication is to establish guidelines for limiting EMF exposure that will provide protection against known adverse health effects.

Detected Issue:

Overly permissive access granted to allUsers (public access).

Risk Level:

High (Severity: High, Score: 9)

Recommendation:

Remove 'allUsers' and use IAM groups or specific roles with least privilege.

#### Real-Time Search-Based Tips:

- \* Tip 1: This page shows you how to make objects you own readable to everyone on the public internet and how to remove public access from your bucket.
- \* Tip 2: When specifying an ACL, most tools allow you to specify multiple scopes for the same entry. The most permissive permission is the access granted to the scope.

#### Detected Issue:

No major public exposure detected.

#### Risk Level:

High (Severity: High, Score: 9)

#### Recommendation:

Review policies periodically for changes.

#### Real-Time Search-Based Tips:
